

CYRUS AGRICON

FUEL CONDITIONING TREATMENT

CYRUS AGRICON FUEL TREATMENT ENHANCES ENGINE PERFORMANCE AND POWER OUTPUT, REDUCES AIRBORNE EMISSION AND FUEL CONSUMPTION.

WITH FUEL NOW THE SINGLE MOST EXPENSIVE FACTOR OF OPERATIONAL COSTS WITHIN THE AGRICULTURE INDUSTRY...

CAN YOU AFFORD NOT TO USE IT?

KEY PRODUCT FEATURES

- Recommended for application to all construction, forestry and agricultural machinery, vehicles and equipment.
- Cleans injectors and enhances fuel atomisation process, bringing a cleaner, hotter burn.
- Protects injectors and prolongs component life.
- Reduces smoking and airborne emission.
- Reduces fuel consumption, typically by 5%.
- Disperses water from storage tanks, protecting fuel from microbial contamination.
- Increases cetane rating and power output.
- Offers additional protection to fuel from freezing at low temperatures.
- Does not contain any abrasive chemicals that may damage components.
- Dosage rate of 1 part Agricon to 1500 parts fuel assures optimum engine performance.
- Available in 5 litres, 25 litres and 205 litres.
- MSDS available upon request.
