

CYRUS

ERADICATE

FUEL BIOCIDES

SUSPECT THE PRESENCE OF BUG IN YOUR DIESEL FUEL?

CYRUS ERADICATE RAPIDLY DESTROYS MICROBIAL GROWTH IN FUEL STORAGE TANKS – ELIMINATING POTENTIAL ENGINE DAMAGE CAUSED BY CONTAMINATED FUEL SUPPLY

CLEAN FUEL: CLEARER PERFORMANCE

KEY PRODUCT FEATURES

“Diesel bug” is created at the interface of water and diesel fuel – exacerbated by the presence of biofuel, warm conditions and condensation build-up resulting in water lying at a storage tank’s base.

THE SYMPTOMS

- Fuel flow blockage caused by brown or brown/black slime wrapped around the fuel filters.
- Increased regularity of fuel filter change.
- Odour from fuel.
- Poor engine performance.

THE SOLUTION

- Cyrus Eradicate Biocide rapidly destroys microbial growth in fuel and storage tanks within 48 hours.
- 1 part Eradicate to 2000 parts fuel is sufficient to remove contamination.
- Severe cases of contamination may require further treatment.
- Regular follow-up doses of Cyrus Fleet or Cyrus Marine Fuel Treatment is recommended to disperse water and inhibit fuel from further recurrences of “bug”.
- Available in 1 litre, 5 litres, 25 litres and 205 litres.
- MSDS available upon request.
